Backup without a new battery?

Read the daytime part.

What Enphase IQ Gateway Fusion is designed to do.

AUGZET
ENGINEERS

Daytime solar.
A built-in socket.

With compatible Enphase IQ8 microinverters, Fusion can supply loads through its socket during daytime cuts.

It can also supply a compatible home UPS for solar charging.

Three limits to understand first.

Output depends on available sunlight.
The unit's stated output limit is up to 3,680 W.
Fusion alone does not provide stored energy after dark.

Confirm the compatible system and intended loads.
